

THE SOLUTION TO
a longer, healthier life
 IS NOT MASKING THE SYMPTOMS
 AND IGNORING THEIR CAUSE,
 BUT **giving the body**
 WHAT IT **needs**
 TO FUNCTION OPTIMALLY.

- Each box of Immunocal Platinum contains thirty 12.5 g foil pouches
- Convenience and portability in every pouch

IMMUNOTEC RESEARCH LTD.

Until we live
 in a perfect world,
 there is

Immunocal[®]
Platinum

**BONDED CYSTEINE™ DIETARY SUPPLEMENT
 WITH MINERALS AND CREATINE**

Immunotec Research Ltd.

In a perfect world there would be no illness or disease. Viruses, germs and oxidants would simply have no interest in the human body. And of course we would never age...

UNTIL WE LIVE IN A PERFECT WORLD THERE IS IMMUNOCAL PLATINUM.

Unfortunately viruses, germs and oxidants do have a great deal of interest in our bodies, attacking with increasing frequency as we age. Pollution in the air we breathe, contaminants in our food and water as well as the stress that is our daily life create the ideal environment to host these marauders of our health and thieves of years of our lives.

THE PARADIGM SHIFTS

Until recently the medical establishment focused on treating the symptoms of illness. Surgery and prescription drugs flourished under this philosophy and the cost of healthcare has spiraled completely out of control.

At Immunotec Research Ltd. we have turned this type of thinking completely upside down. The solution to a longer, healthier life is not masking the symptoms and ignoring their cause, but giving the body what it needs to function optimally.

THE HUMAN BODY IS A WONDROUS MACHINE

At the center of this miraculous phenomenon is the immune system, dispatching the necessary means to battle any and all invaders. The immune system is precisely where the scientists at Immunotec have focused their intense research and development.

Medical researchers concluded that a very small amino acid called Glutathione is the “workhorse” of the immune system. More than a decade of research led to the development of a product capable of naturally boosting levels of glutathione. Immunocal changed the way healthcare was practiced by providing the necessary building blocks the immune system needs to optimally perform.

IMMUNOCAL GOES PLATINUM

Research and development is an ongoing proposition at Immunotec. As new discoveries are made, they are incorporated into our existing technologies resulting in cutting edge products.

Immunotec scientists have now isolated specific molecules of Cytokine Modulating Proteins (CMP*) to

- Assist the body manage normal cellular growth
- Work with the body to repair damaged cells
- Provide increased Lactoferrin to inhibit the growth of disease-causing micro-organisms.

The second addition to the already powerful **Immunocal Platinum** blueprint is to further enhance the anti-oxidation properties with a Redox Modulating Formula (or RMF) to:

- Help neutralize acid production from high protein intake
- Slow down the loss of calcium
- Improve the body's metabolism of insulin, providing increased energy and more effective weight maintenance
- Improve mood, energy, well-being, alertness, concentration, and clarity

This is the newest member of the Immunotec family.
